

Khan Md Fayjul Kabir

UI / UX Developer

ABOUT

I am a tech enthusiast, who is passionate about designing and developing human centered UI as well as front-end development. I have solid understanding of designing and prototyping user interfaces (with Figma, Sketch-App, adobe XD, InVision) and developing through modern technologies and frameworks (such as, React, Redux, TypeScript, JavaScript, HTML, CSS, SCSS with BEM, Ant design, Material UI, Styled-component). As a person, I'm a curious and dedicated learner who is always looking for ways to grow and enhance my competencies.

PROJECTS

MyHappyFund - A Fund Raising Full-stack Application

Ant Design, Express, JWT, MongoDB, NodeJS, React, Redux, Sass with BEM, Stripe

- A team project was done with the collaboration of another developer
- A full-stack project with user authentication, and CRUD operation and Stripe checkout for payment.
- Different users role such as admin, user to add extra privilege.
- My focus area was designing the project UI in Figma and then developed it with React, Redux, Ant Design and Sass for front-end development.

Rest Countries API - Front-end Application

Material UI, React, Redux, Redux-thunk, Redux-saga, TypeScript, Sass

- A front-end focused independent project.
- Populating the front-end side data from 3rd party API.
- React, Redux, TypeScript was used for the development.
- CRUD operation was ensured to play with the countries.
- Styling wad done by Material UI and Sass.

TOOLS & SKILLS

Design

- Figma
- Sketch-App
- Adobe XD
- InvisionApp
- UI/UX Design
- Data Visualization
- Prototyping
- Usability Testing
- Wireframing
- PowerPoint
- Keynote

Development

- React
- Redux
- TypeScript
- JavaScript
- CSS3
- SCSS with BEM
- Styled Component
- Ant Design
- Bootstrap
- Material UI
- HTML5
- Git
- GitHub
- Front-end development
- Responsive Design

LUOKKAPP - Students Attendance App

Paper Sketching, Adobe XD, Invision

- A student team project for the course Interaction Design.
- Process was user research, paper sketching, UI design, prototyping, usability testing and finalizing the design based on the testing feedback.
- Played the role of a Team Lead as well as UI Designer.
- Project finalized by designing 25 mobile app UI.
- Got the highest vote among 15 other student projects.
